

Annotated Bibliography Example

Pearson, Richard Grenville, and American Museum of Natural History. *Driven to*

Extinction: The Impact of Climate Change on Biodiversity. Sterling, 2011.

Summary: This article provides a comprehensive review of the impact of climate change on biodiversity. The author discusses various aspects such as shifts in species distribution, habitat loss, changes in phenology, and extinction risks. There is a plenty of information about environmental factors that cause extinction events, including supervolcano eruptions, and global climate change.

Evaluation: Pearson's article is well-researched and presents a balanced overview of the topic. The author effectively synthesizes existing literature and provides in-depth analysis. The article is supported by reliable data and scientific studies, enhancing its credibility. The writing style is accessible, making it suitable for both experts and general readers. This article would be useful in my essay when talking about extinction events.

Create Your Annotated Bibliography

Using the example above, create an annotated bibliography with a total of 5 entries.

Each entry should be:

- In MLA format
- Contain one paragraph that summarizes the most important information on the web page
- Contain one paragraph that evaluates the quality of the information

Marking Criteria:

- Each entry is worth 5 marks.
- 1 mark for the correct MLA format
- 2 marks for a good summary of the content
- 2 marks for evaluating the quality of the content

Total: /25
