Creating a Works Cited

Name _____

In this exercise, you'll be creating a Works Cited page to get hands-on experience with the MLA citation format. You'll be working with examples of both online and printed sources. I'll provide you with sample citations to use for this task. Additional guidance on MLA formatting can be found in your MLA citation handout and at this online resource: https://owl.purdue.edu/

For most essays, the MLA header is usually placed on the first page. However, for this particular exercise, you should place the MLA header at the very top of your document, above the title.

A correctly formatted MLA Works Cited page should include these features:

- The title "Works Cited" centered at the top of the page.
- The entire document should be double-spaced.
- Include your last name and page number in the top right corner; eg, Smith 1
- Use a hanging indent for each citation.
- Arrange all entries in alphabetical order by the author's last name.

Below, basic citation formats and examples for various source types are provided for your reference.
