

# Group Research and Presentation Activity

**Objective:** Students will work in groups to select a question, research it, and present their findings to the class.

## Instructions:

### Question Selection

- In your group, select one question from the brainstorming session that you are most curious about.
- Make sure everyone in the group is interested and agrees on the question.

### Research Phase

- Use books, articles, and reputable online sources to research your selected question.
- Aim to gather interesting facts, different perspectives, and visuals if possible.
- Divide the research tasks among group members to cover more ground.

### Preparation and Presentation

- Prepare a short presentation on your findings. This could be in the form of posters, slideshows, skits, or any other creative method you choose.
- Ensure that every group member has a role in the presentation.
- Practice your presentation to make sure it fits within the time limit and is clear and engaging.

### Presentation to the Class

- Each group will take turns presenting their findings to the class.
- Be ready to answer questions from your classmates and the teacher.

### Feedback and Reflection

- After all presentations, provide constructive feedback to other groups.
- Reflect on what you learned from this activity and how you can apply it to future research projects.
